4	PIMCO Monthly Income Fund	8.0%
5	PIMCO Canadian Core Bond Fund	5.4%

Who Should Invest in a CAP 1 Portfolio?

The value of the portfolio can go down as well as up. You could lose money. One way to gauge risk is to look at how much a portfolio's returns change over time. This is called "volatility".

In general, portfolios with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Portfolios with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk Rating

Open Access Ltd. has rated the volatility of this portfolio as **Low**. This rating is based on how much the portfolio's returns have changed from year to year. It doesn't tell you how volatile the portfolio will be in the future. The risk rating can change over time. A portfolio with a Low risk rating can still lose money.

Historical Performance

This section provides past returns of the portfolio over specified timeframes (e.g. 1 year, 3 years, 5 years, 10 years). Returns are presented as percentages, compared to a benchmark index, and may include risk measures such as standard deviation or beta. Past performance is not indicative of future results. Investors should consider this information alongside other portfolio details.

Annualized Return (%) as of March 31, 2026				
1 Year	3 Year	5 Year	7 Year	10 Year
3.87%	5.96%	3.23%	3.47%	3.28%
